- Backend Development
- Software Development
- Project Management

PROGRAMMING LANGUAGES AND TOOLS

- Java
- Python
- Kotlin
- MongoDB & NodeJS
- HTML & CSS
- Flutter & Dart
- Javascript & Express
- ReactJS

CORE WORE SKILLS

- Leadership
- Trainability
- Computational Thinking
- Problem Solving
- Teamwork Collaboration
- Flexibility & Agility

PROFILE SUMMARY

I am a BSIT student majoring in System Development at PHINMA University of Pangasinan, specializing in mobile and web development. Passionate about software development and problem-solving, I build efficient, user-friendly applications. Skilled in programming, databases, and modern frameworks, I continuously enhance my expertise to create innovative and scalable solutions.

EDUCATION

PHINMA University of Pangasinan (2022 - Present)

Bachelor of Science in Information Technology
Major in System Development

MAJOR PROJECTS

DisabilityCareers: Connecting Talents with Accessible Job Opportunities
Capstone Project 2024 - 2025
ReactJs | MongoDB & NodeJS

DisabilityCareers is a job-matching platform that connects persons with disabilities (PWDs) to inclusive employers. It helps PWDs find accessible job opportunities while guiding companies on inclusive hiring and workplace accessibility

- Job postings from companies committed to disability inclusion.
- Filters to match job seekers with roles based on skills and needs.
- Successfully developed a mobile application for the project deliverable

A&J AutoFix
3rd Year Project 2024
Flutter & Dart | MongoDB & NodeJS | Firebase

A & J Autofix is a comprehensive online platform designed to streamline and enhance the vehicle repair and maintenance booking process. The platform aims to provide a seamless and efficient experience for both vehicle owners and service providers.

- User-Friendly Interface: Develop an intuitive and user-friendly interface for both web and mobile platforms.
- Enhanced User Experience: Implement additional features such as notification, customer reviews and ratings, and geolocation services to provide a seamless and interactive user experience.

Bibilibeads
2nd Year Project 2023
AndroidStudio | Laravel

DisBilibeads lets you shop for colorful beads and customize unique accessories! Mix and match designs to create stunning bracelets, necklaces, and charms. Unleash your creativity and craft your perfect style!

- Customizable Accessories – Create unique bracelets, necklaces, and charms by mixing and matching colorful beads.
- Easy-to-Use Design Tool – Design your accessories effortlessly with a drag-and-drop customization feature.

Weastern Oceanic Grandiur
1nd Year Project 2022
Html & CSS

Western Oceanic Grandeur is a restaurant reservation website that allows users to book a table, select the number of guests, and explore the menu, which includes appetizers, drinks, and main dishes.

- Simple reservation system with capacity selection
- Well-organized menu (appetizers, drinks, food)
- Responsive & user-friendly design
- Basic form validation for bookings
